- Report Generator

### Systems Monitoring

Our systems are easy to set up using the barcode systems RFID hardware with our friendly mobile APP to monitor the overall inventory control process. Accurate KPI analytics data will enable a user to create aspects of their inventory finished goods and material work in progress

### Inventory Management

Our systems can track products by attributes, colors, and sizes, while monitoring product stocked levels in real-time maintenance to achieve a cohesive approach by projecting sustainability on PO's decision to stock up during seasonal demands.

### Workflow Efficiency

Our method determine its cost of inventory (inventory valuation) directly impacts the financial statements. The three main methods for inventory costing are First-in, First-Out (FIFO), Last-in, Last-Out (LIFO) and Average cost.
